

# Surface Mount Training Kit

SMT Training Kits provide a cost effective and consistent approach to solder training. Instructors no longer have to spend their valuable time keeping track of inventory and looking for scrap production. The parts are packaged in static shielded bags to promote ESD awareness. These SMT kits are a reliable and economical way to ensure that each student and each class receives consistent training materials. The kits contain a variety of common production Surface Mount component types and land patterns that are encountered in today's products. All of the parts are guaranteed solderable. As with all of the STI training kits, customized kits and individual parts are available.

Surface Mount Kits	SST-SMTK2 405-1004	SST-SMTK3 405-1005	SST-SMTK4 405-1006
PWB (SST-SM1E)	1	1	1
PLCC 44	1	0	1
PLCC 68	1	0	1
PLCC 84	1	0	1
14 SOIC	2	2	4
16 SOIC	2	0	2
